SUZANNE HANSEN

AI EVALUATION RESEARCHER | MODEL BEHAVIOR & HUMAN-AI INTERACTION

Michigan, USA | Remote opportunities | suzanneslab@gmail.com

AI Research Portfolio | LinkedIn: suzannes-lab

PROFILE

Independent AI evaluator combining structured annotation, source review, correction analysis, UX research, and writing. Completed 21 case-study reports across conversational safety, evaluator reliability, multimodal fidelity, and human-AI co-design. Hands-on generative-AI use since late 2022.

INDEPENDENT RESEARCH & EVALUATION | SUZANNE'S LAB

Frame research questions, direct comparative tasks, analyze retained interactions, and develop codebooks, rubrics, failure taxonomies, and correction traces. Use AI assistance for drafting, structuring, coding support, and prototyping, with researcher review of evidence, labels, and conclusions.

SELECTED RESEARCH & ANNOTATION WORK

Comparative evaluation and recovery
Beyond First-Response Accuracy: five assistants, a 36,017-word archive, 90 rubric rows, and 20 recovery traces. When the Judge Needs Judging: peer audits, self-audits, trust votes, and evaluator-added errors.

Safety, evidence, and provenance
When Specificity Outruns Evidence: 61 coded records. The Heritage Recipe That Never Existed: 56 annotations. When Brand Voice Becomes Health Advice: 40 annotations examining implied claims and persuasive authority.

Correction quality and audit coverage
Self-Critique Without Recovery: 57 annotations and five correction chains. Audit Displacement: 57 consequential units and a twelve-domain coverage matrix. Separate studies examine numerical repair, role drift, and résumé provenance.

Multimodal and human-AI design research
The Fix That Wouldn't Stay Fixed: 112 numbered image-editing turns. Additional visual studies separate aesthetic quality from instruction fidelity. Cross-project co-design analysis covers 85 paired turns across six fictional business worlds.

REVIEW TOOLS & PROTOTYPES

AI Answer Review | Public guided-review prototype
Designed a human review of task completion, evidence, constraints, and correction follow-through. Directed AI-assisted implementation and reviewed the workflow. View prototype.

Reply Checkup / Zuzu Works | Local prototype
Define customer-service scenarios, evaluation criteria, and review requirements. Direct AI-assisted development of fictional chat demonstrations, transcript analysis, and visual reports.

Email Sequence Diagnostician | In development: Evidence-backed sequence review, targeted repairs, and revision checks.

SUPPORTING PRACTICE & TOOLS

UX/product concept work includes Crestview and CivicLoop: research planning, journeys, flows, prototypes, and accessibility considerations. Simulated inputs are distinguished from participant research. Additional practice includes brand voice, copywriting, worldbuilding, and independent publishing through Sage Tea Publishing.

Tools: ChatGPT, Claude, Gemini, Copilot, Perplexity, Grok, LM Studio, Cursor, GitHub, Excel, Google Workspace, Figma, Miro, and Canva.

EDUCATION

Google UX Design Professional Certificate | Google / Coursera | 2024
